Subject: Tower Standard/Haskell Lake Technical Group Discussion (June 23)
[20160623 Tower Standard Technical Group Discussion.docx](#)

Good Afternoon:

Attached please find the notes from the technical group discussion held on June 23, 2016. I believe that I incorporated the edits provided to me. As an update to the notes, the membrane interface probe and hydraulic profiling tool (MIP/HPT) investigation work was completed yesterday. The additional borings provided useful information about the dimensions of the source area as well as the lateral extent of groundwater contamination.

Feel free to contact me if you have any questions.

We are committed to service excellence.

Visit our survey at <http://dnr.wi.gov/customersurvey> to evaluate how I did.
